Summary of Presentation

My presentation emphasized how **DigiLocker** serves as a **secure, interoperable, and scalable digital public infrastructure** that simplifies document verification, enhances transparency, and supports efficient governance within the education ecosystem. I particularly focused on **DigiLocker's role in enabling automatic, tamper-proof sharing of mark sheets, degrees, and academic certificates**, thereby streamlining administrative processes and ensuring authenticity.

The session further highlighted the importance of **awareness, interoperability, and institutional leadership** in ensuring successful adoption of DigiLocker across educational institutions.

Overall, the conference provided an excellent platform to **exchange insights, share best practices, and discuss the evolving roadmap of DigiLocker** in transforming education and governance through trusted digital services.
