

Report on Educational Visit to the Department of Forensic Medicine, RUHS Hospital, Jaipur

Date of Visit: 09th April 2025

Organized by: Department of Forensic Science, IcfaiTech, ICFAI University Jaipur.

As a part of the academic curriculum for B.Sc. Forensic Science students, an educational visit was organized to the **Department of Forensic Medicine and Toxicology[mortuary], RUHS Hospital, Jaipur** on **09th April 2025**. A total of **20 students** from the B.Sc. Forensic Science program participated in this educational tour, accompanied by **two faculty members**, Mr. Anuj Kumar and Ms. Radha Patel, along with **Lab Assistant** Mr. Shashikant.

The team departed from the university campus at **10:00 AM by bus** and reached the RUHS premises as per schedule.

During the visit, students had the opportunity to explore the following key areas:

- **Mortuary and Postmortem Section**
- **Forensic Medicine Department**
- **Forensic Medicine Laboratory**
- **Pathology Laboratory**
- **Plant and animal Poisons and their forensic significance.**

During the visit, students gained hands-on insights into several crucial medico-legal aspects that are fundamental to forensic science. They learned about plant and animal toxins and their relevance in forensic investigations, along with various types of poisons and methods of their identification in medico-legal cases. The session also covered the types of wounds and their forensic interpretation, as well as the different stages of decomposition and their importance in estimating the time since death. Additionally, students observed pathological analysis conducted as part of postmortem examinations. These real-time observations offered a deep understanding of practical forensic processes, particularly in relation to autopsy procedures and toxicological evaluations. The experience significantly enriched their academic knowledge and provided a clearer perspective on the real-world applications of forensic science. This visit provided the students with **practical insights into medico-legal procedures**, postmortem examinations, and the working of forensic and pathology labs. It was an eye-opening and

educational experience that greatly contributed to their understanding of forensic medicine a vital component of their curriculum.

The faculty and Staff of RUHS Hospital extended their full support and cooperation, allowing the students to observe and understand various aspects of Forensic medical practices. Such field visits play a crucial role in bridging the gap between theoretical knowledge and practical application.
