

The ICFAI University Jaipur
IcfaiTech
Report
Session for Internship by TACK

Internships are an opportunity to network with great people and sharpen skills before entering the workforce. They also help students tremendously with figuring out your true passion and to gain experience and exposure to make a smooth transition into their career when they get hired.

IcfaiTech has always believed in providing the best to its students in terms of Exposure, Opportunities in their career field, creating a balance between experience and their Potential.

Internships not only provide students with the first-hand experience in the real working world but also enable them to understand the career trajectory for a desired job title. Keeping this agenda in mind, IcfaiTech keeps on inviting distinguished professionals from divergent fields to connect with students and provide them internship Opportunities.

- On April 20, 2023 Mr. Vardhan from Tack had an interactive session with BCA 2nd year (Gen, Cyber Security, Data Science and AI-IOT) students to brief them about His startup organization named-TACK which provides mentoring sessions to the students making them job ready. Mr Vardhan Tyagi is an entrepreneur from Udaipur, who did his masters from Boston and is having 4 years of experience in Corporate field.
- TACK provides mentors from distinguished fields like Data Scientist, Sr. Business analyst, Software development , Product designer and Software Engineer who are working with eminent software organizations. Mentorship programs aim to provide students with guidance from mentors with specific skills and knowledge and helps students grow personally and professionally through their relationships with their mentors.

Glimpse of the Event
